

STUDIOVERSE & COACHING STUDIO

Complete Context Handoff for Claude Instance Continuation

June 21, 2026

Quick Navigation

- SECTION 1: Dinesh Wadhwani — Person & Context
- SECTION 2: StudioVerse Platform — Architecture
- SECTION 3: Coaching Studio — Product Spec
- SECTION 4: Technical Implementation (Backend)
- SECTION 5: Deliverables Created This Session
- SECTION 6: Key Decisions & Rationale
- SECTION 7: Ongoing Work & Next Steps
- SECTION 8: File Locations & Attribution
- SECTION 9: Communication Preferences

SECTION 1: Dinesh Wadhwani — Person & Context

Current Roles (Parallel)

Senior Director R&D, NICE Ltd (Sept 2021–Present) — 500+ person org across 8 product lines, \$500M+ revenue influence. NOT mentioned in coaching materials.

- Active inbox: FedRAMP POA&M remediation, Japan BCP, React/UI strategy, AI maturity assessment mapping

Founder/CEO/CTO, StudioVerse (Bootstrap, solo, pre-launch) — Config-driven multi-tenant SaaS platform. Flagship: Coaching Studio. 3 warm prospects.

- Marketing: 4 interns until end of July 2026

Leadership Coach — "The Coach Dinesh" / thecoachdinesh.com

- 150+ hours coaching, 20+ cohorts, pursuing ACC certification (ICF)
- Internal clients: NICE, Capita, IBM. External: Tracksoft, EduVal, Deeper

Connected to EduVal Private Limited (EdTech, Pune)

- MahaExam (₹250/mock, 4th/7th std), Deeper (JEE/NEET/MHT-CET), Deeper University campus (go-live April 2028)

Background & Assets

- 25+ years in product engineering and leadership
- Multiple technology patents (US Patent 12,645,831 B2 — AI-driven sensitive data masking)
- Active NSE equity trader (DineshTrade algorithmic platform)
- Based in Pune, India. Son Daksh (Class X CBSE student)

Key Attribution Rules

- MahaExam files → Author: Shubham Shetye (Sales Manager)
- All other files → Author: Dinesh Wadhwani
- StudioVerse/Coaching Studio: Dinesh stays behind scenes in public-facing materials

SECTION 2: StudioVerse Platform — Architecture

Core Stack

- Frontend: Next.js (App Router) + React + TypeScript
- Backend: Firebase (Firestore, Auth, Storage, Cloud Functions)
- Payments: Razorpay (INR-first), test + live mode switching
- Email: Resend (transactional), GoDaddy (inbox)
- AI: Groq LLM (for assessment question generation, analysis)
- Mobile: Capacitor (future native apps)
- Hosting: Vercel (web), Firebase (backend)

Multi-Tenant Architecture

Single repository, config-driven branching via `NEXT_PUBLIC_STUDIO_TYPE` environment variable.

- All studios share same codebase, data schema, auth
- Studio-specific: branding, terminology, selected UI behaviors, domain routing

Universal Four-Role Model (All Studios)

SuperAdmin: Platform administrator, full control across all tenants

Company: Organization/tenant owner or representative

Professional: Coach, trainer, recruiter, facilitator (varies by studio)

Individual: End user: coachee, learner, candidate, athlete (varies by studio)

Verticals (Studios)

- Coaching Studio (PRIMARY — closest to launch)
- Recruitment Studio (warm prospect leads)
- Training Studio (warm prospect leads)
- HR Studio
- Fitness Studio

Go-to-Market Framework (6-Layer)

- 1. Strategic Foundation
- 2. Value Proposition Clarity
- 3. Sales & Marketing Enablement
- 4. Channel & Partnership Strategy
- 5. Launch Cadence
- 6. Measurement & Optimization

SECTION 3: Coaching Studio — Product Specification

Vision & Brand

Professional, executive-grade leadership coaching platform.

- Visual language: Harvard Business Review, Oxford, McKinsey editorial quality.
- NOT gamified, NOT cartoonish, NOT mobile-game aesthetic.
- Clients: Managers stepping into new roles, senior leaders, startup founders, organizational cohorts.

Three-Level Taxonomy (Locked)

Level 1: Categories (8 Total)

- Personal Effectiveness
- Communication & Presentation Skills
- People Management
- Team Building
- Strategic Thinking
- Business Acumen
- Change Management
- Diversity, Inclusion & Culture

Rationale: Modern, plain-language positioning for executive platform (not "X Leadership")

Level 2: Subcategories (32 Total)

One per major concept (e.g., "Executive Presence", "Emotional Intelligence", "Resilience", etc.)

File: StudioVerse_CoachingStudio_Master_Taxonomy.xlsx — comprehensive reference with all descriptions

Level 3: Topics (203 Total, ~6-8 per Subcategory)

Discrete, measurable behaviors or dimensions for assessment scoring

- Examples: Under Executive Presence — Physical Presence, Vocal Authority, Composure
- Purpose: Enables topic-level program recommendation and cross-assessment synthesis

Core Features

1. Assessments (13 Live, ~20 Pre-Launch Target)

- Problem Identification Effectiveness Index (PIEI)
- Change Leadership Readiness
- Communication Influence Quotient
- Conflict Management Effectiveness
- Emotional Intelligence Scan
- Executive Presence Simulation Index (EPSI)
- Leader as Coach
- Noise Vs Clarity
- Reflection Style
- Stakeholder Influence Index (SII)
- Strategic Problem Solving & Decision Intelligence Index (SPSDI)
- Team Leadership Effectiveness
- The Strategic Priority Engine

Design: Config-driven (Groq), AI-powered scoring, topic-tagged reports

- Dinesh's proprietary IP: 8 leadership assessments adapted from frameworks

2. Programs (32 Curated)

One program per subcategory (32 total)

- Format: Curated YouTube videos (canonical speakers: Sinek, Goleman, Edmondson, Meyer, Grant, etc.)
- All verified URLs + Nano Banana image prompts (1200×675px, editorial quality)
- File: StudioVerse_CoachingStudio_Programs_Updated.xlsx

3. Events (40 Global, June–September 2026)

- Cohorts, workshops, webinars, conferences
- File: StudioVerse_CoachingStudio_Events_Updated.xlsx

4. Wedge Strategy (Assessment → Program → Events → Coach Marketplace)

- Coachee takes assessment → System identifies low-scoring topics → Recommends programs addressing those topics
- Program participation → Event recommendations → (Future) 1-1 coach marketplace access

5. Pricing Model (Finalized)

- Track A: Freemium (unlimited assessments, limited programs)
- Track B: Usage-based credits (prepay, consume per resource)
- Track C: Per-assessment company pricing (bulk org rate)
- Track D: Hybrid setup fee + usage (enterprise)

All pricing: INR-first

6. Credit Packages (5 Tiers)

Starter: 20 credits • ₹500

Player: 50 credits • ₹1,200

Champion: 100 credits • ₹2,000

Pro: 250 credits • ₹4,000

Elite: 500 credits • ₹7,500

SECTION 4: Technical Implementation (Backend)

Data Model Consolidations (May 2026)

1. Earning Packages — Unified Document

All packages consolidated into single Firestore document: `earningPackages/{tenantId}`

- Contains arrays for: `creditPackages`, `promotionPackages`, `listingPackages`, `botPackages`, `leadPackages`
- Benefit: 5 Firestore reads — 1 read per operation

2. Languages — Single Reference Document

All 30 languages stored in: `languages/items`

- Previous: 30 separate reads. Now: 1 read
- Added 'language' field to `ProgramRecord`, `EventRecord`, `AssessmentRecord` (default: 'en')

3. Taxonomy — Nested Structure

Categories contain nested `SubCategories` which contain nested `Topics`

- Single read returns full nested structure: `categories` — `subCategories` — `topics`
- Fallback methods available for backward compatibility (flatten on read)

Service: `listCategoriesNested()` and `listCategoriesFlattened()`

Seed Data System

Unified, idempotent Cloud Function callables for initializing tenant data:

- `seedLanguages()` — 30 languages
- `seedCompetencies()` — 5 competency frameworks
- `seedCreditPackages()` — 5 credit tiers
- `seedPromotionPackages()` — 3 promotion packages
- `seedListingPackages()` — 3 listing packages
- `seedBotPackages()` — 2 bot hero packages
- `seedLeadPackages()` — 3 lead fee packages

Files: `functions/src/admin/seedEarningPackages.ts`, `seedLanguages.ts`, etc.

Frontend: `src/services/earningPackages.service.ts`, `src/modules/admin/SeedDataPage.tsx`

Security Architecture

- Guest and public flows never write to Firestore directly (server-mediated via API routes)
- Bot referral and guest log writes use Admin SDK in trusted backend
- Treasury operations (registration bonus, referral reward) run in Cloud Functions with idempotency markers
- Firestore rules enforce blocked client writes for protected collections
- All secrets server-side (`.env`), clients receive only `NEXT_PUBLIC_*` values
- OWASP-aligned controls: access control, secure design, authentication, data integrity

Email Configuration

- Coaching Studio domain: `coachingstudio.in`
- Sender: `contact@coachingstudio.in` (verified with Resend)
- Transactional: Resend, Inbox: GoDaddy mailbox

- DNS records: GoDaddy (not Vercel)

Razorpay Integration

- Test + Live mode switching via RAZORPAY_MODE environment variable
- Keys: RAZORPAY_TEST_API_KEY / RAZORPAY_LIVE_API_KEY + respective KEY_SECRETS
- Test harness available at /test/razorpay with full checkout flow

Firebase Projects

- Test: studioverse-test (development & validation)
- Production: studioverse-18552 (live data, real users)

SECTION 5: Deliverables Created (This Session)

StudioVerse_CoachingStudio_Master_Taxonomy.xlsx: 8 categories, 32 subcategories, 203 topics with descriptions

StudioVerse_CoachingStudio_Programs_Updated.xlsx: 32 programs with video URLs and Nano Banana image prompts

StudioVerse_CoachingStudio_Events_Updated.xlsx: 40 global events (Jun–Sep 2026) with image prompts

StudioVerse_CoachingStudio_Assessments.xlsx: 13 assessments with AI analysis prompts

32 Program Image Prompts: 1200×675px, HBR/Oxford editorial quality, text-free, photorealistic

40 Event Image Prompts: Same visual standard as programs

13 Assessment Image Prompts: McKinsey editorial quality, text-free

Dinesh_Wadhwani_Coach_Profile_1pager.docx/pdf: Professional coaching profile (one page) for BYLD

Dinesh_Wadhwani_Coach_Profile_Narrative.docx/pdf: Extended coaching narrative (3 pages) for BYLD

HANDOFF_DOCUMENT_COMPLETE_CONTEXT.md: Comprehensive markdown handoff (this session)

SECTION 6: Key Decisions & Rationale

Three-Level Taxonomy

Category → Subcategory → Topic supports both granular assessment scoring and program recommendations. Future: explicit assessment-to-topic mappings.

Eight Category Names

Modern, plain-language (not "X Leadership"). Professional positioning for executive platform.

Taxonomy Scope

8 categories, 32 subcategories, 203 topics. Ambitious but manageable; covers leadership development comprehensively.

Editorial Photography Style

HBR/Oxford/McKinsey grade (not AI illustrations or gamification). Serious B2B positioning.

Text-Free Image Prompts

Overlay subcategory/event names in design tool, not in image. Reusability + flexibility.

One Program per Subcategory

32 programs = manageable, recognizable speakers (Sinek, Goleman, Edmondson, Meyer). Quality > quantity.

Unified Earning Packages

Single earningPackages/{tenantId} document instead of 5 collections. 5 reads → 1 read, atomic writes.

Idempotent Seeding

Seed functions detect existing data and skip re-writes. Safe for repeated admin operations.

Assessment-Topic Mapping (Future)

Currently implicit in prompts. Retrofit 13 assessments with explicit measured_topics[] arrays for synthesis.

Dinesh Positioned as Coach

Not 'tech exec who coaches.' Leadership coach with tech background (context for org complexity). 5-pillar approach highlighted.

SECTION 7: Ongoing Work & Next Steps

Immediate (Next Session)

- Assessment Retrofit: Add explicit 'measured_topics' array to each of 13 assessments
- Image Generation: Generate all images via Nano Banana (32 programs, 40 events, 13 assessments)
- Assessment-Program Mapping: Build logic for topic-based program recommendations
- Video URL Verification: Click through 14 fresh videos to confirm working

Medium-term

- Programs Library: Searchable by topic, category, speaker, video length
- Events Matching: Auto-recommend events based on assessment results
- Development Plans: Generate personalized learning paths (assessment → programs → events → coach)
- Coach Marketplace: Build eventual coach listing layer (Phase 2)

Long-term

- White-Label Deployments: Recruitment Studio, HR Studio for warm prospects
- Original Content: Produce Dinesh-voiced videos (replace curated YouTube)
- Cohort Management: Build internal offsite/cohort management features
- Mobile Apps: Capacitor-based iOS/Android native apps

SECTION 8: File Locations & Attribution

Output Directory

/mnt/user-data/outputs/

- All deliverables saved here for user download

Working Directory (Claude)

/home/claude/work/

- Temporary scripts and intermediate files

Uploads Directory

/mnt/user-data/uploads/

- User-provided files (docs.zip with StudioVerse documentation)

Naming Conventions

StudioVerse files: StudioVerse_[ModuleName]_[Version].xlsx/docx/pdf

Coaching Studio files: StudioVerse_CoachingStudio_[ModuleName].xlsx

MahaExam files: Author: Shubham Shetye (Sales Manager)

Everything else: Author: Dinesh Wadhwani

SECTION 9: Communication Preferences & Working Style

Writing & Tone

- Coaching context: Warm, empathetic, genuine
- Product context: Technical, clear, structured
- NICE leadership updates: Concise, structured, bullets okay
- Marketing/coaching materials: Prose preferred, editorial voice (HBR/Oxford)

What NOT to Do

- Never mention NICE in coaching-facing materials
- Never reference DISC or Big Five by name in public (Dinesh's IP, but avoid explicit naming)
- Never conflate StudioVerse with EduVal/MahaExam (separate platforms)
- Razorpay ≠ Stripe (use Razorpay exclusively)

Preferred File Formats

- Specifications: Excel (.xlsx) for structured data
- Documents: Word (.docx) for shared materials, Markdown (.md) for internal docs
- Outputs: Word + PDF for professional profiles

APPENDIX: Other Projects (Context)

DineshTrade — Algorithmic Trading Platform

- NSE cash equity (CNC delivery) automated trading
- Strategies: Accumulator, Catalyst, Market Boom, Pivotal
- Broker: Angel One SmartAPI (recently migrated from Zerodha)
- Tech: Supabase, documented in FUNCTIONAL_SPEC.md, HANDOFF.md, TRADING_ENGINE_CORE.md

EduVal/MahaExam/Deeper

- MahaExam: ₹250/mock, 4th/7th std, 22,714+ schools across 28 districts
- Deeper: JEE/NEET/MHT-CET prep platform
- Deeper University: 16-slide campus project, go-live April 2028, 11 user roles, multi-tenant SaaS

Daksh's Study Portal

- Class X CBSE portal: 50 chapters (Maths, Science, Social Studies)
- 50 MCQs per chapter, randomized drawing, Fisher-Yates shuffling
- iPad-optimized, timezone-independent login (ddmmyyyyhh format)

Document Summary

This handoff document captures:

- Complete context of Dinesh Wadhwani's work, roles, and projects
- StudioVerse platform architecture and multi-studio design
- Coaching Studio product specification (features, taxonomy, pricing)
- Technical implementation details (data models, seed system, security)
- All deliverables created in this session (taxonomies, programs, events, assessments, profiles)
- Key decisions and rationale for each major choice
- Specific next steps for immediate, medium, and long-term work
- File locations, naming conventions, and attribution rules
- Communication preferences and working style guidance

Status: Ready for handoff to new Claude instance. All major systems documented, decisions locked, next steps clear.
